Sonaré [sōn-ar-ə]

Sonaré hand-cast glass tile is a meditative exploration of color. The collection captures the look of rising incense, playfully encapsulating wisps of whimsical color in glass. The result is a mysterious and magical tile that invites the viewer to fill in the blanks between opacity and translucence. Two 3 x 9 formats flow beautifully with each other and any Lunada Bay Tile collection of your choosing. Tone's nearly smooth surface evokes layers of water freezing on a lake while Sonic's dimensional texture calls to mind the movement of sound waves. The enchanting quality of these timeless tiles invite the designer to push boundaries, transforming tile into art-like installations.
