Luce ['lʊ̃s]

noun

origin: French

1. *Light*

Just as the sun glitters across moving water, light glimmers over softly textured glass. Luce, a collection of contemporary handmade glass mosaics, uses reflection and refraction of light to create shifts in color and illumination. As light bounces off the tile surface, these semi-opaque mosaics absorb and reflect nuances of color around them. The 12 subtle pastel hues coordinate with today's movement in color. Available in four distinctive patterns: Clipper, Feather, Fin and 2-inch Hexagon.
