

Lunada Bay Tile elevates concrete tile design through engineering and artistry to deliver tactile surfaces with modern shapes and colors. [Contourz](#) three-dimensional tiles transform walls into sculpture, and the flat field tiles create an atmosphere that ranges from quiet elegance to industrial. Specially engineered to the highest durability for residential and commercial installations, Contourz concrete tiles have a similar thickness to many of Lunada Bay Tile's ceramic and glass tile series and can be combined with our other tile collections.
