

The South Atlantic coast of Africa is considered some of the most stunning desert terrain in the world. A trip to this surreal destination offers vistas of rippling dunes, flat clay pans, and rocky outcrops, not to mention endless sky. This incredible landscape brings inspiration for the [Namibia](#) series, a three-dimensional ceramic tile collection which incorporates a special hand-sculpting technique to create tiles that are truly one-of-a-kind. Every tile is created by hand and no two tiles are the same. The undulating patterns come in four formats that engage a sense of adventure and rejuvenation — like the discovery of a hidden oasis.
