

## Not Your Average Gray: Shibui in Tungsten

The popularity of gray has risen dramatically over the past three years, introducing a new level of sophistication to classic and modern spaces. The new “it” color has quickly

[Subscribe](#) to our email list

gained popularity over traditional beiges, taupes and off-whites, providing a fresh option for designers looking for timeless, effortless chic.

“I love gray because of its versatility; it can go cool or warm,” said Feras Irikat, director of design and marketing for Stone & Pewter Accents. “More functional than your average neutral, gray can be combined with and complemented by almost every color of the spectrum.”

We introduce our newest gray, Tungsten, to our Shibui glass series. This gorgeous color provides amazing design versatility. Pair it with stainless, white or icy blues for a cool modern approach, or apply it next to natural woods, mocha and creams for something a little warmer and transitional. No matter how or where you use it, Tungsten is an interesting take on neutral.

## The Series
